

Happy Friday Everybody!

Highlights: We were SO BUSY this week! From conducting some super specific research to design and bring to life our box cars and airplanes then testing them out, to writing stories about where in the world our cars or airplanes we'd want them to take us and why, and learning about homophones! From a simple discussion with Ms. Mary about what makes us..us, we learned the difference between genes and jeans! In addition to continually adding compound words to our list of things we find everyday all around us, we've now started a homophone list! See if your child can find some at home and encourage them to write the compound and/or homophones words on their own list to bring in on Monday!

I apologize in advance for some your children's new found passion for skydiving:/ After watching a really cool documentary earlier this week, we realized there are many more ways to "travel" in the air such as hang-gliding (some of us made our own with a coffee filter and pipe cleaner), parasailing, hot-air ballooning (ask them why it's important to go in the morning), and skydiving. This last one made some of the class really want to try it! I'm sorry!

Thank you to Mrs. Saam (Alana's mom) for coming in and reading us one of Alana's favorite books for her birthday, Everybody Loves Bacon! We all LOVED it and loved having you play some games with us! Parents, please feel free to bring in a healthy snack for a birthday treat, come share your child's favorite book and/or game, etc. when it's their birthday. The class loves having visitors and it definitely makes your child feel super special on their day:)

Reminders:

- Bank deposits are on Fridays:)

- Please make sure to return picture day forms
- We have show & tell everyday so if your child has something related to our exploration they would like to bring in and tell us a little bit about, please let them!

That's all for this week:) I hope you all have a great and warm weekend!

-Ms. Anna
